Professional Summary

Portfolio

Full Stack JavaScript Developer with hands-on experience building **business applications using the MERN stack**. Skilled in **Node.js, Express.js, React.js, MongoDB, RESTful APIs, and third-party integrations**.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Redux Toolkit, Context API, HTML5, CSS3, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, Webhooks, Cron Jobs
Databases: MongoDB, Mongoose, MySQL, PostgreSQL
Tools & DevOps: Git, GitHub, Bitbucket, Postman, Jira, Docker, AWS S3, AWS EC2, GitHub Actions

Education

Viva Institute of Technology Virar, Maharashtra
Master of Computer Applications ***(CGPA: 7.5)*** Aug 2024 – Jun 2026

Experience

Binny's Jewellery Private Limited Jan 2026 – Oct 2026
Junior MERN Stack Developer

- Developed **MERN-based ERP modules** for inventory, client, and order management, supporting **2,000+ clients** and **1,000+ product SKUs**.
- Built **Node.js and Express.js backend services and RESTful APIs** supporting business workflows for **2 user roles**, with data validation, authentication, and authorization.
- Implemented **JWT Authentication and Role-Based Access Control (RBAC)** across Admin and Client workflows, securing permission-based access to business data and application features.
- Optimized **MongoDB queries and Aggregation Pipelines** for data retrieval and processing across workflows handling **1,000+ product SKUs**.
- Integrated **Webhooks, cron jobs, and third-party services to automate 10+ business workflows**, enabling event-driven processing and reliable data synchronization.

Projects

Aira AR Agent – MERN Stack

- Built a **MERN-based Accounts Agent platform** for automated WhatsApp debt collection, customer engagement, and receivables workflow management.
- Developed backend workflows using **Node.js, Express.js, Webhooks, cron jobs, and MongoDB Aggregation Pipelines** for real-time event processing and scheduled payment follow-ups.

AI-Powered Online Exam Proctoring System

- Engineered an **AI-powered online exam proctoring system** using Computer Vision, OpenCV, Deep Learning, and Speech Recognition for real-time candidate authentication and behavioral monitoring.
- Designed a **multi-layer anti-cheating pipeline** that detects **5 anomaly types**: multiple-person presence, candidate absence, unauthorized speech, mobile phone use, and tab switching.

Track App – Internal Business Tracking Mobile Application — React Native

- Built a **React Native mobile application** for Binny's Jewellery to monitor and manage outstanding receivables and payables across daily business operations.
- Implemented **5 core modules – Search, Dues, Work in Progress (WIP), Orders, and Quotes** – to centralize financial tracking, work management, order processing, and quotation visibility.

Certifications

- **Claude Code in Action** – Anthropic Academy
